

Hailing from India, Deathknell is a Melodic Death Metal Band formed in 2009. With over a decade in the Indian metal scene, the band members are committed to creating roaring death metal with highly melodic guitar riffs and heavy drum rolls

In 2012, the band dropped their first album, "Still to Decide." The album comprises different tracks from various genres, including four melodic death metal tracks and two rock tracks. Since it is neither exactly a metal nor a rock album, it's titled "Still to Decide." It is based on death and destruction, a concept related to life after death. So, it's a little difficult to put it in a specific genre.

The Band has been featured on various national and international radio stations and TV broadcast platforms, like MTV, Doordarshan, etc.

The Band has touring and performing live at various music festivals, including North East Festival, Hard Rock Cafe, Turquoise Cafe-Delhi, IISER-Mohali, IIT, Shoolini University H.P., Jaypee University in H.P., and has shared the stage with the likes of Godless, Elemental and many more. The band has even bagged many awards and titles in many live shows in North India.

In 2020, the band released their second album, "Can't Stop, Can't Kill".

The album has seven melodic death metal tracks with a few bonus tracks. The different tracks in this album are focused on self-realization and an individual's connection with different emotions - from anger to somewhat spiritual.

"Can't Stop, Can't Kill"

"Apothegm of death"

"Feel your soul"

"I will return"

"Struggle to salvation"

"Torment of life"

“Who I am”

“Kamyabi ke nishaan”

Currently The Band is working on their third Album, doing live shows, collaborating with artists around the globe, and running their youtube channel.

With all this lined up and many more future endeavors, the band is all set to be unstoppable and bringing more metal to your life.
